SWAYAM DEVENDRA PANCHAL

Artificial Intelligence & Data Science Undergraduate

+91 9833507492 | panchalswayam35@gmail.com | github.com/SDP42 | linkedin.com/in/swayam-panchal-11281b34a

SUMMARY

AI & Data Science undergraduate (CGPA 9.70/10) with strong foundations in Python, SQL, Machine Learning, Deep Learning, Data Analytics and Statistics. **4× Hackathon Winner and 2× Ideathon Winner** with hands-on experience building full-stack, data-driven and AI products end to end, from data pipelines and models to deployed web platforms used by real users.

ACHIEVEMENTS

- **4× Hackathon Winner | 2× Ideathon Winner:** Won 4 hackathons and 2 ideathons, building working AI, data and full-stack solutions under time constraints.
- **JPMC Code for Good:** Participant in J.P. Morgan Chase & Co. Code for Good, a hackathon building technology solutions for non-profit organizations.
- **Leadership:** Secretary, DJS NSDC x Infomatrix (DJSCE): co-led organization of Elevate 1.0, a 24-hour national hackathon; manage events, sponsorships and a 47-member organizing committee.
- **Mentorship:** Mentor juniors in Python, NumPy, Pandas, Matplotlib, Seaborn and core ML algorithms through hands-on sessions and notebooks.

TECHNICAL SKILLS

Languages & Databases: Python, SQL, JavaScript, SQLite, DBMS
AI / ML: Machine Learning, Deep Learning, Computer Vision, NLP, TensorFlow, PyTorch, YOLOv9, Sentence Transformers, KeyBERT, Explainable AI (Grad-CAM)
Data: Pandas, NumPy, Matplotlib, Seaborn, EDA, Statistical Analysis, Data Visualization, Dashboards
Web & Tools: React.js, FastAPI, REST APIs, Vercel, Git, GitHub

PROFESSIONAL EXPERIENCE

InAmigos Foundation | *AI Data Analyst* Jun 2026 – Jul 2026

- Performed data cleaning, preprocessing, EDA and statistical analysis using Python, Pandas and NumPy to identify trends and patterns.
- Built data visualizations, dashboards and analytical reports that communicated insights and supported data-driven decision-making.

PROJECTS

Elevate 1.0 – National Hackathon Event Platform | *React.js, Vercel* elevate1-0.vercel.app

- Co-built and deployed the official website for Elevate 1.0, a 24-hour national-level hackathon by DJS NSDC x Infomatrix, reaching 2,500+ views and supporting 700+ registrations.
- Digitized the complete event lifecycle: project submissions, shortlisting, on-day registration desk check-in and meal-pass tracking for 115+ on-campus participants across 32 finalist teams.
- Kept the platform running live through the 24-hour event, giving organizers a single system for participant data, check-ins and meal distribution.

Stratify – AI-Powered Algorithmic Trading Platform | *Python, React.js, SQL* dombivli-hackathon-s6vb.vercel.app

- Developed a full-stack trading platform with financial market APIs for real-time data ingestion, strategy execution, portfolio tracking and performance visualization.
- Engineered a backtesting framework in Pandas and NumPy using RSI, MACD and Moving Averages to generate trading signals and analyze risk-adjusted returns.

Medical AI – Chest X-Ray Diagnosis System | *YOLOv9, DenseNet-121, PyTorch*

- Built a deep learning system to detect and classify chest conditions from 2,000+ X-ray images using computer vision.
- Applied Explainable AI (Grad-CAM) for model interpretability and evaluated prediction performance to support clinical decision-making.

BrainMapAI – AI Knowledge Graph | *FastAPI, React.js, NetworkX* github.com/SDP42/BrainMapAI

- Developed a knowledge graph platform using Sentence Transformers, KeyBERT and SQLite for concept extraction and semantic embeddings.
- Engineered an end-to-end NLP pipeline for document parsing, semantic search, similarity matching and recommendations to surface knowledge gaps.

EDUCATION

Dwarkadas J. Sanghvi College of Engineering, Mumbai University 2024 – 2028
B.Tech in Artificial Intelligence and Data Science | CGPA: 9.70/10

Vidyaniketan Junior College of Commerce and Science 2024
HSC, Maharashtra State Board | 87.67%

Shree Siddhi Vinayagar English High School 2022
SSC, Maharashtra State Board | 93%
